

ISIVC 2026 Program Overview

The **13th IEEE International Symposium on Image, Video and Communications (ISIVC 2026)** will take place in **Beni Mellal, Morocco**, from **20 to 22 May 2026**.

This year's edition, held under the theme "**Beyond the Visible: AI-Powered Multimedia Processing and Communication Beyond Limits**", promises to be a landmark event, honoring the legacy of **Professor Driss Aboutajdine** while showcasing cutting-edge research in AI-driven multimedia technologies.

Program Highlights

The final schedule is currently **under preparation**, but we are thrilled to announce our **distinguished keynote speakers**, who will share their insights and latest advancements in the field:

- **Professor Djemel Ziou** *University of Sherbrooke, Canada (Keynote topic to be announced)*
- **Professor El Mustapha Mouaddib** *University of Picardie Jules Verne, France (Keynote topic to be announced)*
- **Professor Sofia Ben Jebara** *Sup'Com Tunis, Tunisia (Keynote topic to be announced)*
- **Professor Mohamed Daoudi** *IMT Nord Europe, France (Keynote topic to be announced)*

The symposium will feature **technical sessions, workshops, and panel discussions** across four main tracks:

- **SAP: Signal and Audio Processing**
- **CVIP: Computer Vision and Image Processing**
- **DCN: Digital Communications and Networking**
- **DSA: Data Science and Applications**

What to Expect

- **Keynote presentations** by global experts.
- **Technical paper sessions** with peer-reviewed contributions.
- **Networking opportunities** with researchers, academics, and industry professionals.
- **A special tribute session** celebrating the life and work of Professor Driss Aboutajdine.

The **detailed program**, including session timings and abstracts, will be published soon. Stay tuned for updates!
